About Indian Orthopaedic Research Group

Indian Orthopaedic Research Group was formulated in 2007 with single aim of promoting orthopaedic research in India. Over the years the organisation is grown in both size and activities. We have been part of more than 100 studies published in national and International Journals. We are running academic websites and also run workshops and courses on research methodology, manuscript writing and thesis. We have also initiated setting up Academic Research Divisions at various academic institutes in India. We run the largest group discussion of orthopaedic surgeons on facebook comprising of more than 12,000 orthopaedics surgeons from across the globe. Starting clinician initiated Journals is one of major initiative and our first journal, the Journal of Orthopaedic Case Reports is now Pubmed Indexed. Currently our focus is on 'Training by Publication' and providing Free Articles for All. Under these initiatives we have started Journals like Journal of Bone and Soft Tissue Tumors, International Journal of Paediatric Orthopaedics, Asian Journal of Arthroscopy, Trauma International and Asian Journal of Arthroscopy. Our very special initiative is Journal of Orthopaedic Complications which focusses on publishing complications. A variety of future plans are being conveyed at IORG and with support of orthopaedic fraternity, we will work to implement them.

[We request you to Join us in this movement and invite your comments and suggestions. Please write to us at indian.ortho@gmail.com / drashokshyam@gmail.com](mailto:indian.ortho@gmail.com)
