"AcEVLP" Systems
Variable Angle Locking Plate Systems

Anatomical design
smooth edges make it possible to the skin side crest, reduces soft tissue irritation

Double Column Fixation, enhance stability

Different Screw positioning for styloid fixation, supporting linear articular surface, and the interior radio-ulnar joint.

K-wire holes for the temporary plate fixation

LCF lag combo-hole for plate position adjustment

The Variable locking hole design, with the variable angle locking plates, makes a maximum 15 degrees for each direction
