## Foreword

Dhiren Ganjwala<sup>1</sup> M.S. (ortho)

Life is a learning process and learning is a lifelong process. This is true for professionals in any field as knowledge expands rapidly and it is difficult to keep pace with it.

Paediatric Orthopaedic Society of India (POSI) has hosted a variety of educational activities in the field of paediatric orthopaedics to support our one common aim: improving the quality of patient care.

International Journal of Paediatric Orthopaedics (IJPO), the official journal of POSI is an important tool to serve this purpose. I wish that the knowledge circulated by IJPO will improve the quality of care offered to children not only in India but around the world.

I congratulate Dr. Jayanth Sampath, the current editor of IJPO, for the hard work and untiring efforts to make this possible. I also thank the editorial board members for their dedication and devotion to bring out such an informative inaugural issue. It is a matter of pride that the contributors to this issue are from different countries across 3 continents.

I wish IJPO every success in its mission to disseminate knowledge for better treatment to children suffering from musculoskeletal problems.
