Editorial

Jayanth S. Sampath FRCSEd (Tr & Orth)[1]

It is a pleasure to bring you another issue of International Journal of Paediatric Orthopaedics with interesting articles and case reports of relevance to the practising orthopaedic surgeon.

This issue has a mix of various topics from paediatric trauma to sports medicine. We kick off with an excellent review of anterior cruciate ligament (ACL) injuries in children, a problem that is of increasing relevance to orthopaedic surgeons in the developing world as greater numbers of children participate in contact sports. The article covers all aspects of ACL injury management from risk factors and clinical examination to diagnosis and management. This is followed by an interesting description of a new clinical entity called "Rachitomalacia" by Dr Anil Agarwal and co-authors. We close with three reports relating to cerebral palsy, trauma and skeletal dysplasia. Please do share the articles with your trainees and fellows. IJPO issues are easily downloadable free of charge and in full-text format from our website www.ijpoonline.com

We invite your suggestions and comments for any improvements to the journal. Kindly write to us editor.ijpo@gmail.com

It is my pleasure to acknowledge the contributions of authors, reviewers, editors, and the backend team who have been instrumental in bringing out this issue.

Sincerely

Dr Jayanth S Sampath
Editor, International Journal of Paediatric Orthopaedics
